

ALLOWING THE MATTRESS
TO RECHARGE YOUR SLEEP

Static Protection

By reducing the external voltage your body is exposed to during sleep, Climasoothe helps promote better blood circulation and greater oxygenation of your cells, which can reenergize your body and improve your immune system.

-  Climasoothe Fabric Overstress
-  Natural Fabric Overstress
-  Synthetic Fabric Overstress

Climasoothe Highlights

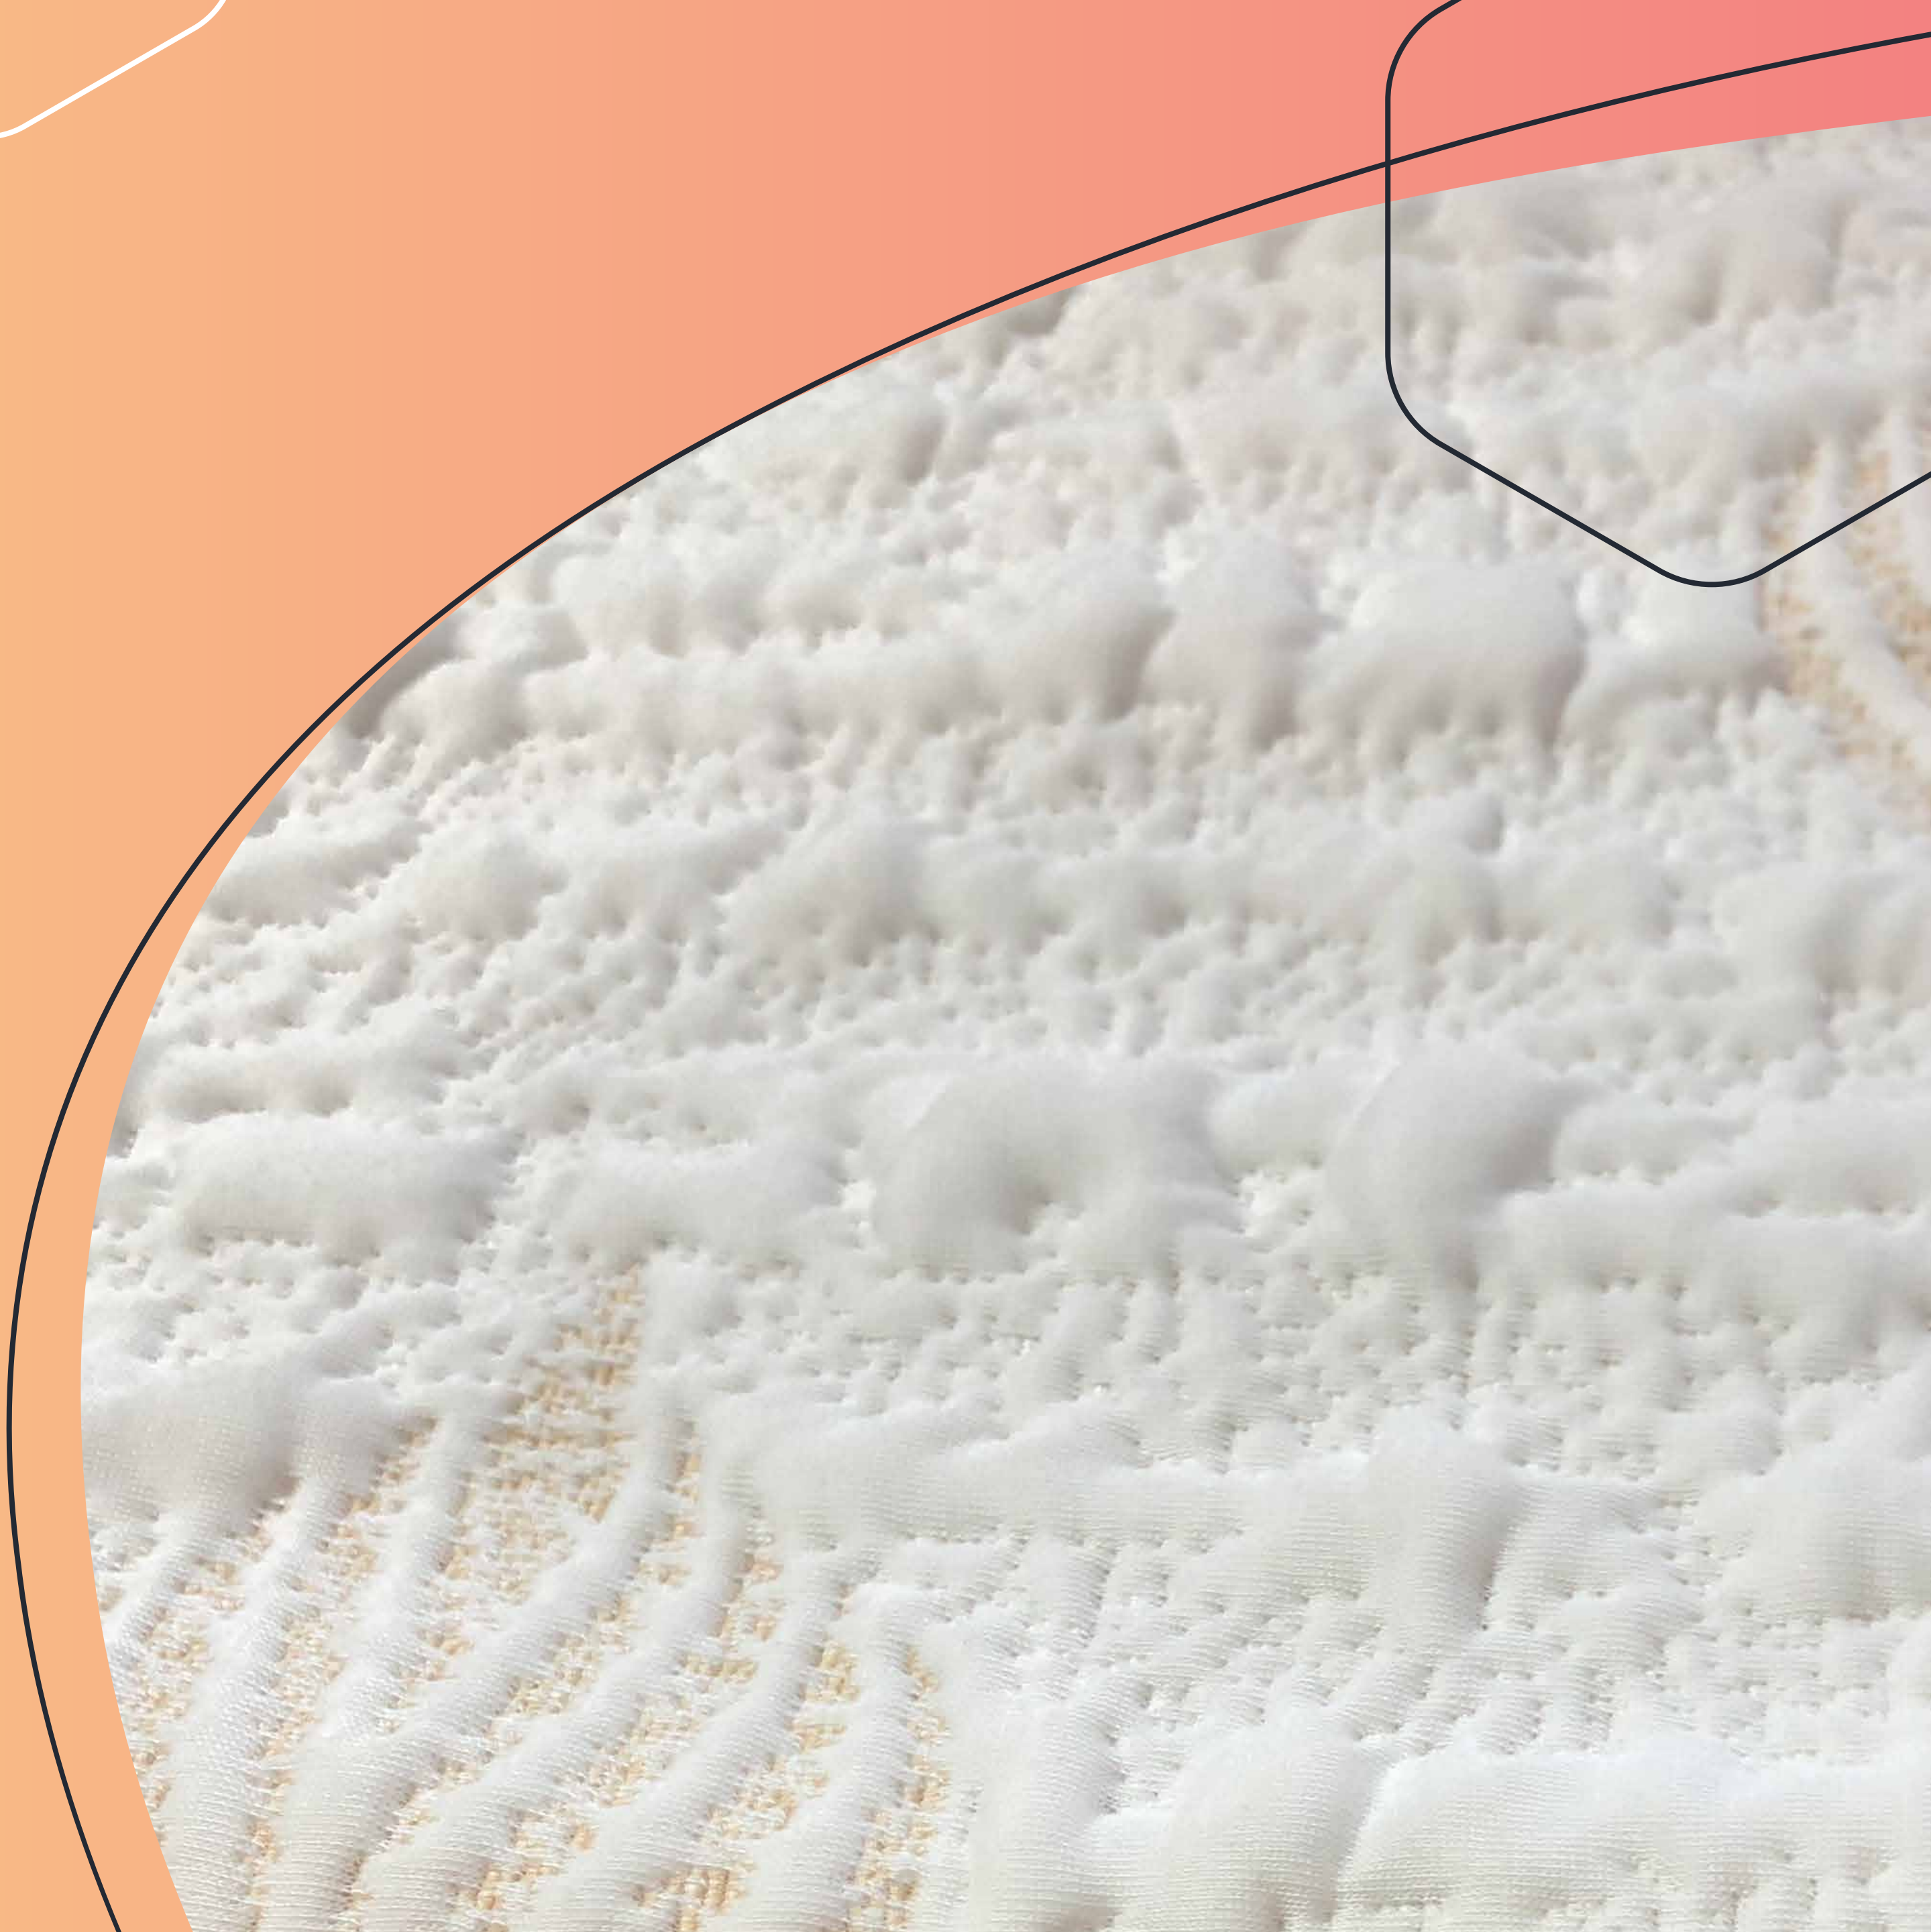

-  OEKO-TEX® approved
-  Reduces static tension
-  Soothes nervous system
-  Anti-allergenic
-  Washable

How it works

Our Climasoothe yarn contains a conductive material based on active Carbon that absorbs and disperses the electrical charges that can accumulate around your sleeping environment by nearby cell phones, iPads or other electronic devices. Preventing voltage from discharging on your body means your muscles are more relaxed while you sleep increasing the quality and restorative nature of your rest.

Additional Benefits

The high conductivity characteristics of our Climasoothe yarn also improves the water wicking properties of the fabric, which helps slow down skin moisture build up, and helps block dust particles from attaching to the fiber making the mattress more hygienic as well.
