

CoolBalance

BALANCING TEMPERATURE  
FLUCTUATIONS FOR AN  
UNDISTURBED SLEEP

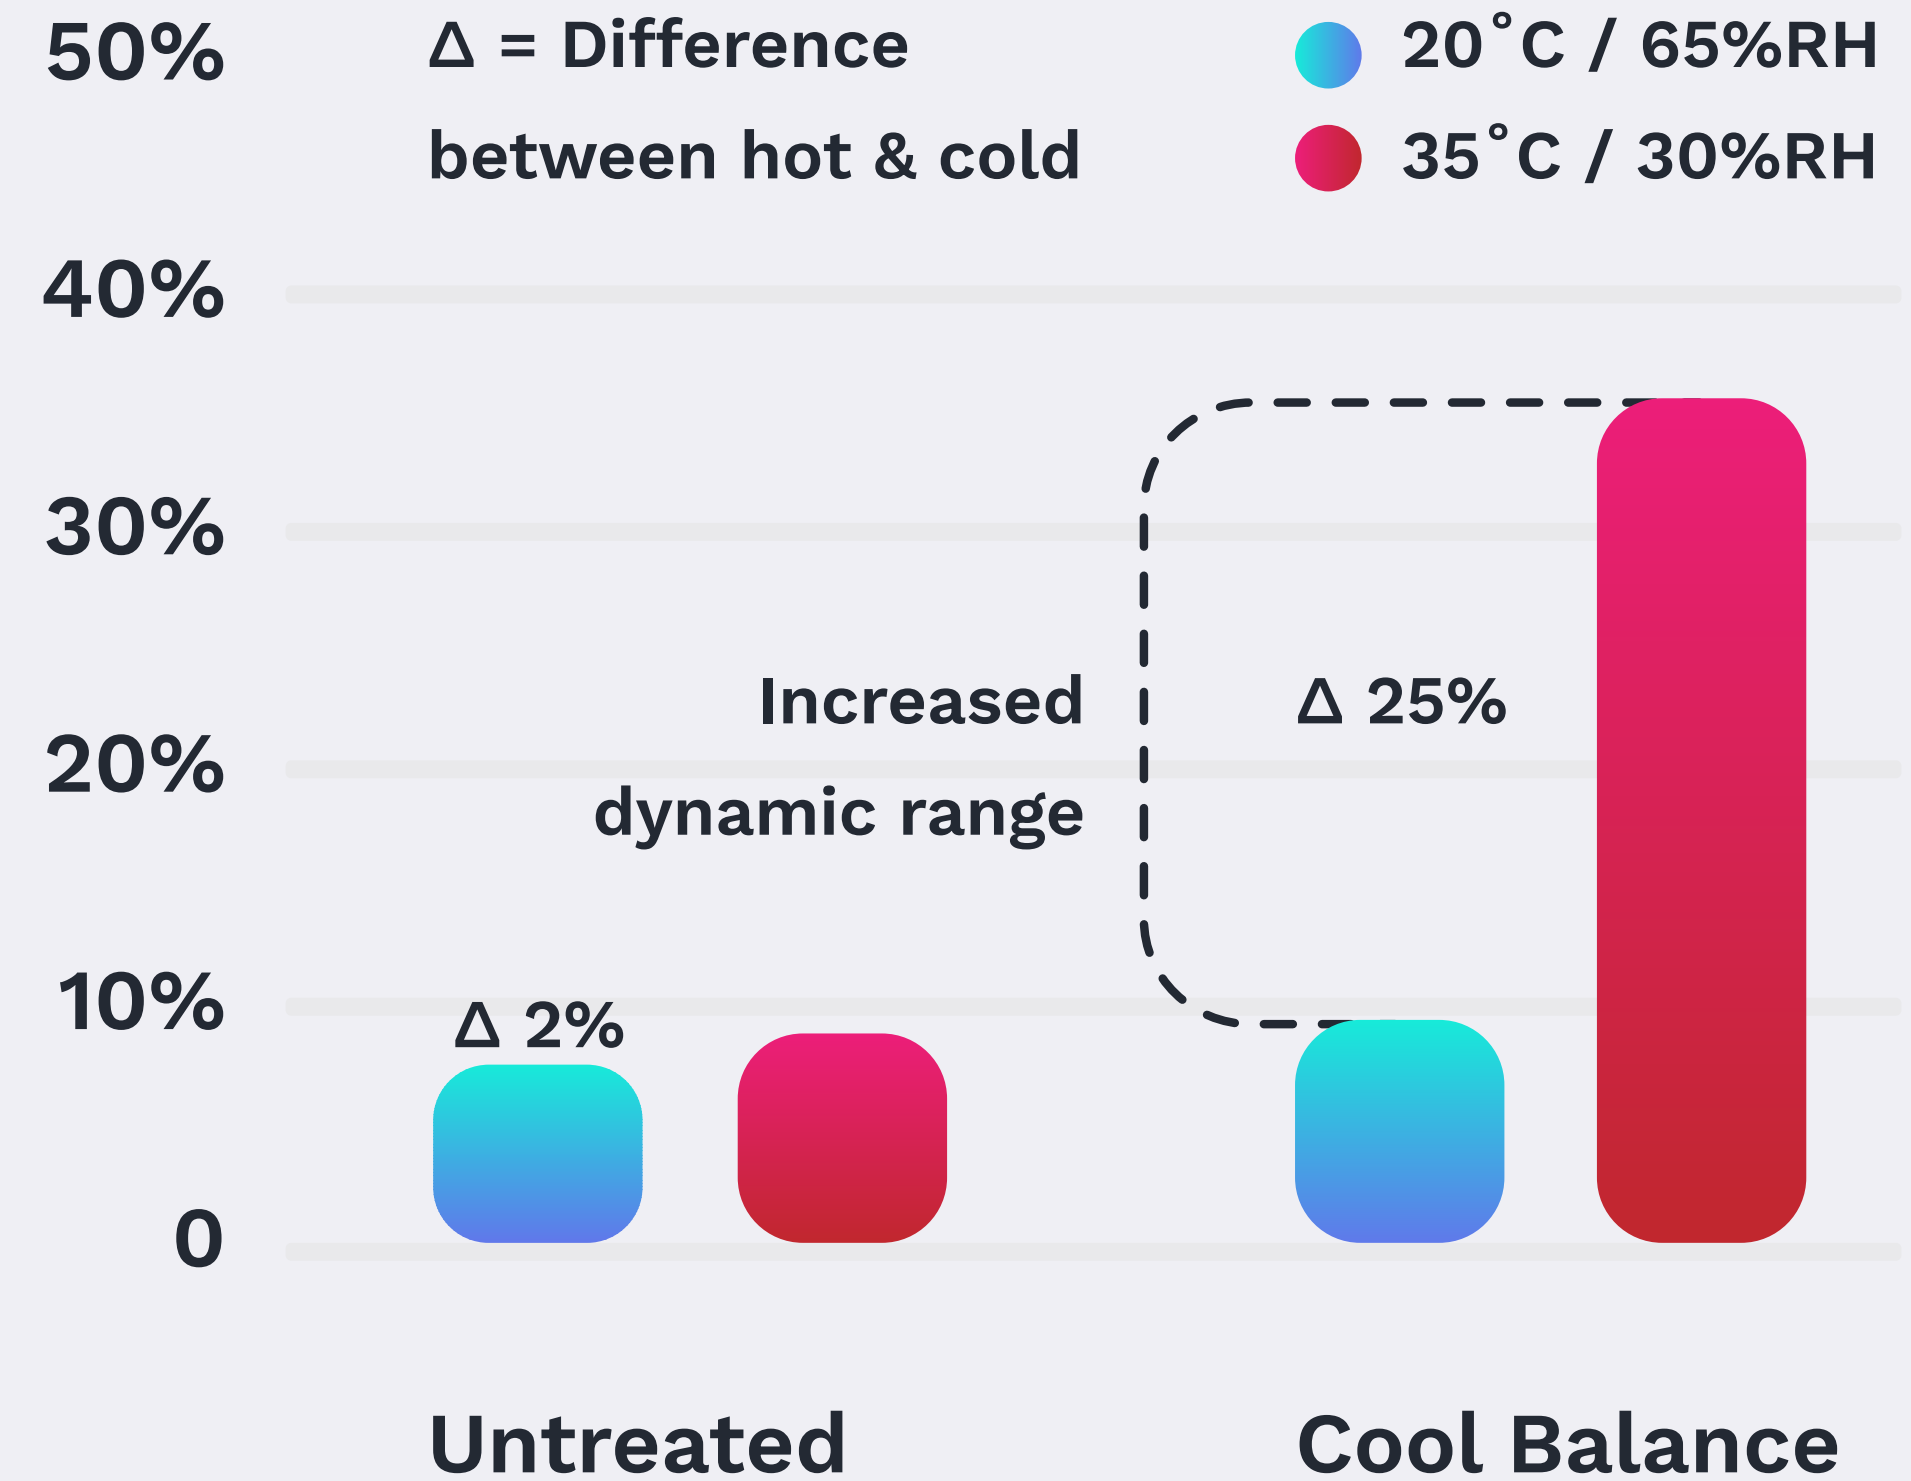

# HOW IT WORKS

Our Cool Balance treatment uses upgraded microcapsule technology for a proactive balancing of your natural temperature fluctuations during sleep. Its revolutionary dual action cooling technology automatically activates if your body temperature rises too quickly and deactivates once your body has returned to a comfortable resting temperature providing a more restorative night's sleep.

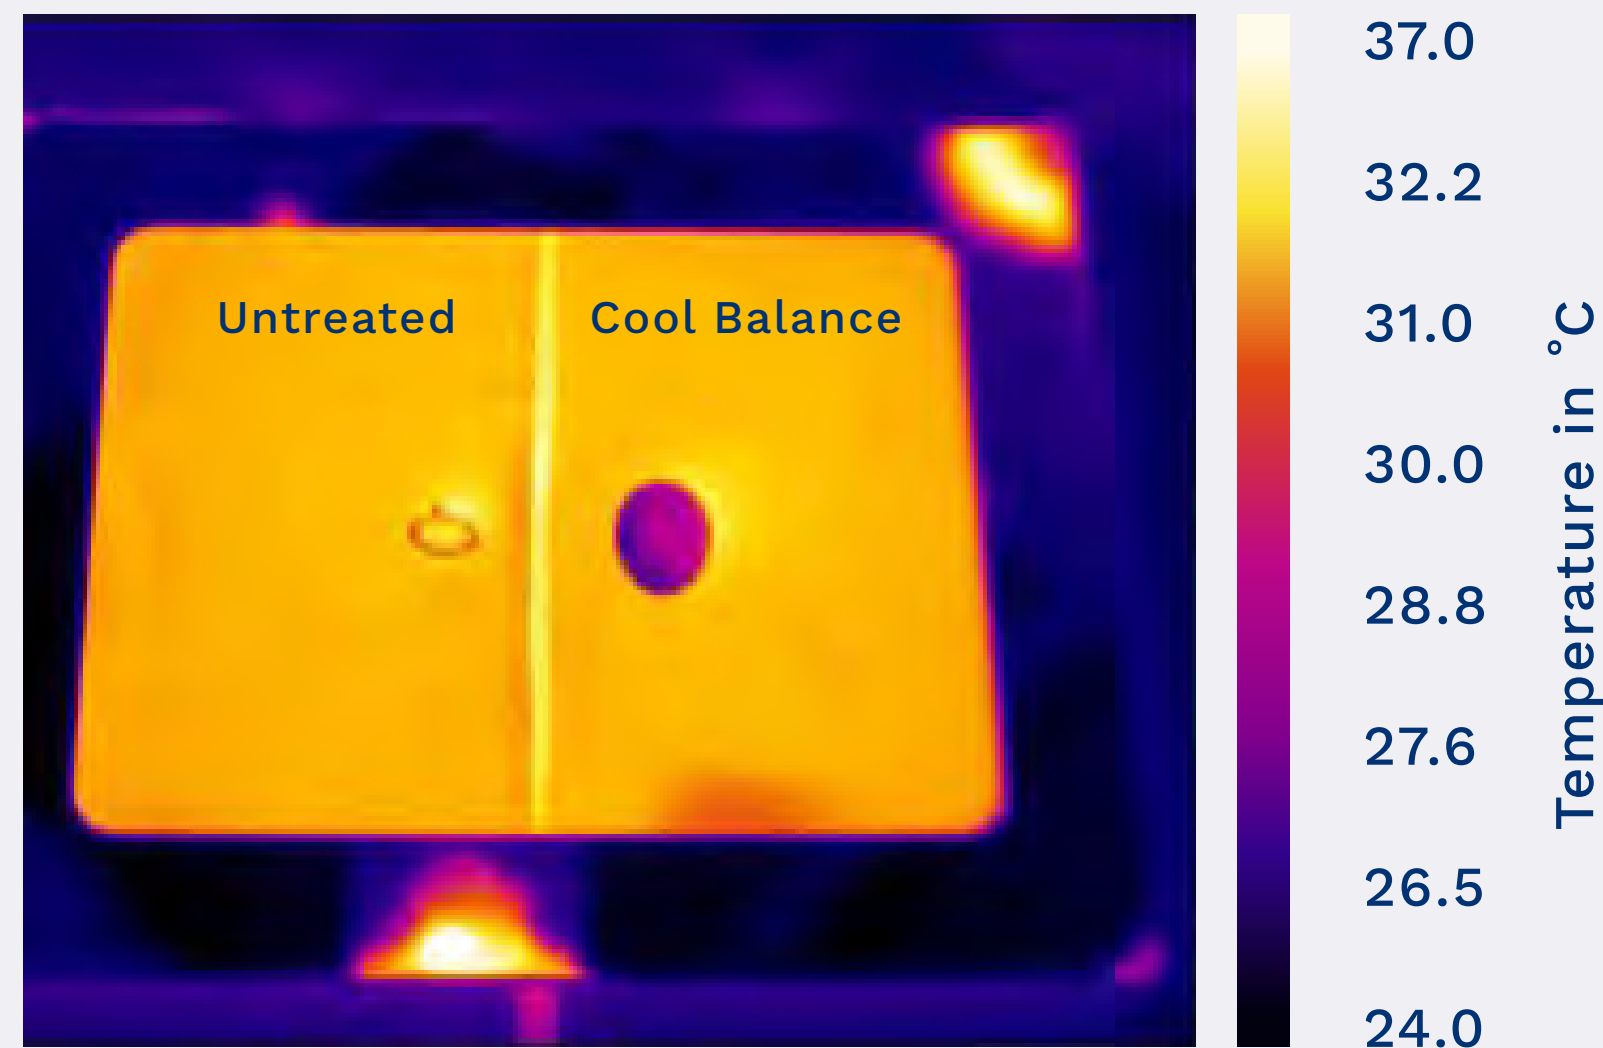

Evaporation Loss (% @ 15 mins)

# TEST RESULTS

Cool Balance treatment responds to your body's temperature cooling the fabric by up to 2.5°C in order to ensure you sleep in consistent comfort.

The water drop (sweat) area is significantly cooler on the treated fabric (right) than the drop on the untreated fabric (left)

## COOL BALANCE HIGHLIGHTS

- ✓ OEKO-TEX® and Bluesign® approved
- ✓ Premium thermoregulatory function
- ✓ Responds to your skin temperature
- ✓ Washable

Enjoy greater comfort and well being on top of a mattress fabric that works to help keep your body temperature in balance allowing for a more refreshing night's sleep.
