

THERMAL COMFORT THAT
REACTS TO YOUR BODY

THERMOREGULATION

Bedding textiles treated with phase change material (PCM) support thermal comfort by absorbing your body's excess heat, storing, and then releasing it when necessary.

- ## PCM HIGHLIGHTS
- ✓ OEKO-TEX® and Bluesign® Approved
 - ✓ Cools Down When Your Body is Warm
 - ✓ Heats up When your Body is Cold
 - ✓ Wash Durable

THERMOREGULATION

HOW IT WORKS

Our PCM treatment works in conjunction with the body's natural air conditioning system to allow you to sleep through the night comfortable and wake up rejuvenated. It adds a temperature sensitive polymer to your textile that reads and reacts to your body heat. Then when necessary, the textile will work to evaporate moisture resulting in a cooler and dryer sleeping environment.
